Hi Jennifer

Rachael has been looking at the ecological information but the majority of the ecological appendices are not the full reports just the results. Whilst there are some additional descriptions within the Biodiversity chapter this is not sufficient and I need full reports to enable a full review of the ecology on site and to verify results

The applicant needs to submit full survey reports, to include, details of all surveyors, full methods used, desk based search and relevant descriptions of habitats or features. The survey reports must follow relevant best practice.

The surveys which require full survey reports are:

All bat surveys;

Reptile survey;

Water vole survey;

Hedgerow survey.

In addition, the Local Record Centre datasearches are also required

Regards

Nicola
